

Software not reviewed

**S**ilviBASE was developed and is distributed by Natural Resource Planning Services (NRPS) based in Gainesville, Florida. They offer two versions of their software – SilviBASE 2.0 for smaller communities and SilviBASE 4.0 for larger communities. SilviBASE 2.0 is only available if NRPS is hired to conduct the inventory. SilviBASE 4.0 can be provided with an inventory or sold as a stand-alone product. NRPS is currently working on upgrading their software to Windows® and to be the Year 2000 (Y2K) compliant. NRPS prefers to limit the range of their services to the southeastern United States, where SilviBASE is being used by 17 communities.

### *Services*

- Tree inventories
- Management plans
- Budgeting
- Hazard tree inventories
- Tree and landscape appraisal
- Tree protection plans

### *System requirements*

#### *SilviBASE 2.0*

- MS-DOS®
- 286 processor
