

Software not reviewed

TreeMaster was developed and is distributed by Urban Forestry Consultants (UFC) based in El Sobrante, California. TreeMaster uses Microsoft® Access 97 as a database program, however purchasing Access 97 is not a requirement to run TreeMaster. UFC prefers to limit the range of their services to the western United States, where there are over 25 communities using TreeMaster.

Services

- Tree inventories
- Hazard tree inventories
- Management plans
- Master tree plans
- Grant writing

System requirements

- Windows® 95, 98, NT®
- 486 processor
- 16 MB of RAM

Software cost

TreeMaster is available from Urban Forestry Consultants for \$3,500.00. UFC generally conducts the tree inventory for their client in addition to the sale of their software.

Technical support

A manual and online documentation are provided with TreeMaster. Technical support can be purchased for \$750.00 per year and includes software upgrades.
