

Sustainability Assessment Highlights for the Northern United States

United States
Department of
Agriculture

Forest Service

State and Private Forestry

Northeastern Area

NA-TP-05-03

Acknowledgments

Helen Thompson, Northeastern Area (NA) Writer-Editor, deserves the credit for translating the technical jargon into English. Her tactful suggestions and patience in working with the authors are responsible for the publication reading like more than a list of facts. Tom Luther, NA GIS Specialist, provided nearly all the maps used in this publication; his cartographic skills will be obvious to the reader. Margaret Miller-Weeks, NA Forest Health Specialist, has helped shepherd the development of the technical report these highlights are drawn from and is largely responsible for discerning the need for this more accessible summary document. Casey Giffen developed the early drafts of this report before moving on. Ken Dudzik, Northeastern Research Station, is a talented photographer who graciously offered his photographic library for our use. Will McWilliams, Northeastern Research Station, provided invaluable assistance in the acquisition and interpretation of the Forest Inventory and Analysis data. Alyssa Sloan, North Central Research Station, compiled and generated all the tables based on the Forest Inventory and Analysis data. Sherri Wormstead, NA Sustainability Program Assistant, provided research assistance with economic indicators and helped prepare the tables and graphs in this report for layout and design. Debbie Muccio, NA Program Assistant, provided assistance with graphics and tables. And finally, Carol Lagodich, NA Visual Information Specialist, painstakingly pulled it all together into an attractive package for publication.
